

# Panolam Metals

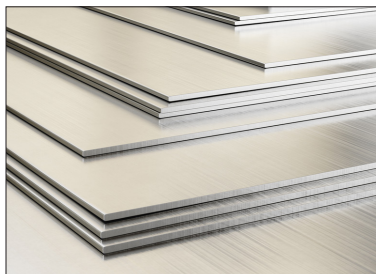

To better cover all of your wall protection needs, Panolam has partnered with Deco Technologies to offer you a selection of beautiful and durable metal laminates. Choose from a range of 22 patterns covering both the Designer and Ultragrain series, or inquire about a custom design. Every pattern is available in either ACM or Aluminum substrate and coordinates well with available Panolam HPL patterns. These metal based laminates allow for ease of Manufacturing without all the waste, deforestation, and matching issues associated with using real wood veneer based laminates.

## ACM Series

ACM panels are "sandwich" panels with a high degree of flatness, an excellent strength to weight ratio and are impact resistant. Often used in wall coverings as stand alone building products.

## Aluminum Series

Aluminum panels are thinner than ACM and can be used in non-impact applications such as acoustic ceiling tile. Aluminum can also be used as a "skin" over other materials.

## APPLICATIONS:

- Partitions
- Door Skins
- Architecture Shapes
- Ceiling Panels
- Office Furniture
- Fixtures and Casework
- Column Cladding
- Interior Wall Applications
- Displays & Signage
- And many more

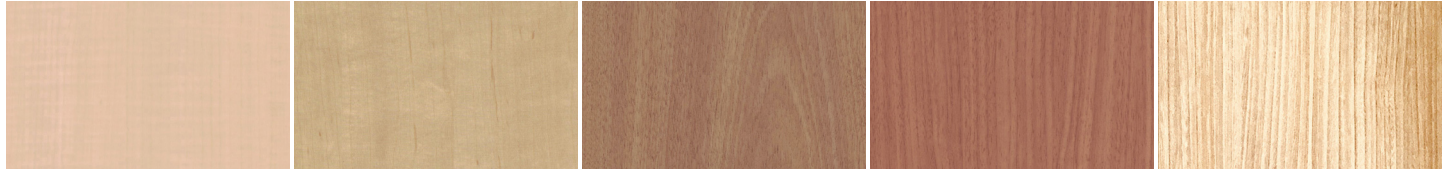

**ACM THICKNESS:** 0.118", 0.236"

**ALUMINUM THICKNESS:** 0.032", 0.040"

**SHEET SIZE:** 4' x 8'

## UltraGrain™ Series

The ultimate in three dimensional realism without the difficulties of using real wood veneer.

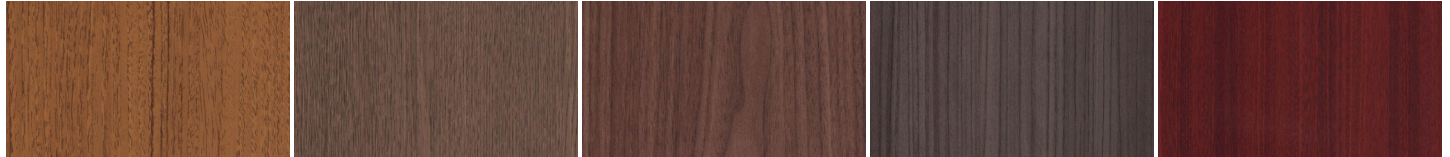

**Cremona Sycamore**  
W213

**Leo Rock Maple**  
W786

**Lt. Cathedral Cherry**  
SW27

**Rose Walnut**  
SW45

**Lebanon Cedar**  
W92A
